

**EXISTING SEPTIC TANK SYSTEM INSPECTION**

The purpose of this inspection is to determine if the existing sewage disposal system on your property is of sufficient size, in proper working order and located so as to accommodate a new dwelling/structure or a change of use.

For this determination to be made, you will need to supply the necessary information on the attached form. It is most important that you supply the name of the person/party who had the system originally installed.

The property lines, new dwelling/structure, well, and septic tank must be marked on the property. Color-coded ribbons are provided for this marking.

- Pink "Property Line" Ribbon ..... Property Corners
- Blue/White Stripe Ribbon ..... New Dwelling/Structure Corners
- if the house is there and not changing you do not have to mark it.**
- Blue Ribbon..... Well
- Pink Ribbon..... Septic Tank

Also be sure that the House Number is visible from the road so there will be no problem locating the property.
