

*****NOTICE*****

Soil Evaluation (Septic Permit)

Reduced Fee Option

Effective May 1, 2016

Stokes County Environmental Health will be offering two fee options when applying for a new soil evaluation (septic permit). You may choose to schedule a backhoe with an operator to assist the Environmental Health Inspector with the initial soil evaluation and the fee will be reduced to \$100.

If you choose not to schedule a backhoe, then the standard fee will remain at \$150; however, you may be required to provide a backhoe at a later date. No refund will be given if backhoe pits are required after the initial soil evaluation.

This change does not affect any other Stokes County Environmental Health Fees.

If you have any questions, please call Environmental Health at 336-593-2403.

Thank You, Environmental Health Staff
